Statement on California Proposition 65

California Proposition 65, the California Safe Drinking Water and Toxic Enforcement Act of 1986, is intended to protect drinking water sources from chemicals known to cause cancer, birth defects or other reproductive harm, and to inform citizens about possible exposures to such chemicals.

TDK-Lambda has reviewed and evaluated the substance list of the California Proposition 65 regulation against our products. The results of the investigations showed, to the best of our knowledge, no risk of exposure to Prop 65 chemicals when the product is properly handled by service technicians and used for the intended purpose.

For additional information, visit www.p65warnings.ca.gov.

Signature:

A handwritten signature in black ink, appearing to read "G. Cutler", with a long horizontal flourish extending to the right.
