HWS150A/EHA

SPECIFICATIONS (2/2)

A288-01-01/EHA

*Read instruction manual carefully, before using the power supply unit.

=NOTES=

- *1. At 100VAC/200VAC, Ta=25°C, nominal output voltage and maximum output power.
- *2. For cases where conformance is required to meet various safety specs (UL, CSA, EN), Input voltage range shall be from 100 - 240VAC (50-60Hz).
- *3. Output derating needed when input voltage less than 90VAC. Refer to OUTPUT DERATING CURVE (A288-01-02/EHA-_).
- *4. Not applicable for the inrush current to Noise Filter for less than 0.2ms.
- *5. Refer to instruction manual (A286-04-01_) for measurement of ripple voltage.
- *6. 85 265VAC, constant load.
- *7. No load-Full load, constant input voltage.
- *8. Constant current limit and Hiccup with automatic recovery. Avoid to operate at over load or short circuit condition.
- *9. OVP circuit will shut down output, manual reset (Re power on).
- *10. Measured by the each measuring method of UL, CSA, EN and Den-an (at 60Hz), Ta=25°C.
- *11. Output Derating
 - Derating at standard mounting. Refer to OUTPUT DERATING CURVE (A288-01-02/EHA-_).
 - Load (%) is percent of maximum output power or maximum output current, do not exceed its derating of maximum load.
- *12. The result is evaluated by TDK-Lambda standard measurement condition.
 - The power supply is considered a component which will be installed into a final equipment.
 - The final equipment should be re-evaluated that it meets EMC, Vibration and Shock directives.
- *13. Output voltage setting at the time of shipment. At 100VAC, nominal output voltage and maximum output current.

HWS150A/EHA

OUTPUT DERATING

A288-01-02/EHA

| Ta (°C) | LOAD (%) | | | | |
|-----------|------------|------------------|--|--|--|
| 1a(C) | MOUNTING A | MOUNTING B, C, D | | | |
| -10 - +30 | 100 | 100 | | | |
| 50 | 100 | 60 | | | |
| 60 | 60 | 35 | | | |
| 70 | 20 | 10 | | | |

*Refer to dotted line for output derating curve, when input voltage range is " $85 \leq Vin < 90$ " for the MOUNTING A.
