<b>Test Item Description</b> .....	Component DC-DC Power Supply
<b>Trade Mark(s)</b> .....	None
<b>Manufacturer</b> .....	TDK-LAMBDA AMERICAS INC 3000 Technology Dr, Suite 100 Plano TX 75074 UNITED STATES
<b>Model/Type reference</b> .....	i7Azz***A%%V-#xx(-R)  Where where zz may be 4W or 2W or can be any two alpha numeric characters that represents input voltage between 4.5-60Vdc input, 60A max input current, *** represents rated output current between 0A - 70A, %% represents rated output voltage between 0.8Vdc – 32Vdc, # could be any alphanumeric character and xx indicates a number or alphanumeric character which do not affect safety related features. May be followed by Optional –R indicating RoHS compliance
<b>Ratings</b> .....	Optional  Input: 4.5 - 60 VDC, 60 A Max Output: 0.8 - 32 VDC, 70 A Max 750 Watts Max

B.2.5 – INPUT TEST: SINGLE PHASE

Testing conducted in accordance with IEC62368-1, 2nd Edition, CAN/CSA-C22.2 NO. 62368-1 2nd Ed, Issued December 1, 2014, and UL 62368-1 2nd Ed, Issued December 1, 2014, was considered representative to the test required per UL62368-1, 3rd Ed December 13, 2019; CAN/CSA-C22.2 No. 62368-1, 3rd Ed December 13, 2019; and IEC62368-1:2018, 3rd Ed. Test was covered under E220248-A6002-CB.

B.1.5, B.2.6, 5.4.1.4, 6.3, 9.3 - NORMAL OPERATING CONDITIONS TEMPERATURE MEASUREMENT

Testing conducted in accordance with IEC62368-1, 2nd Edition, CAN/CSA-C22.2 NO. 62368-1 2nd Ed, Issued December 1, 2014, and UL 62368-1 2nd Ed, Issued December 1, 2014, was considered representative to the test required per UL62368-1, 3rd Ed December 13, 2019; CAN/CSA-C22.2 No. 62368-1, 3rd Ed December 13, 2019; and IEC62368-1:2018, 3rd Ed. Test was covered under E220248-A6002-CB.

B.3 - SIMULATED ABNORMAL OPERATING CONDITIONS

Testing conducted in accordance with IEC62368-1, 2nd Edition, CAN/CSA-C22.2 NO. 62368-1 2nd Ed, Issued December 1, 2014, and UL 62368-1 2nd Ed, Issued December 1, 2014, was considered representative to the test required per UL62368-1, 3rd Ed December 13, 2019; CAN/CSA-C22.2 No. 62368-1, 3rd Ed December 13, 2019; and IEC62368-1:2018, 3rd Ed. Test was covered under E220248-A6002-CB.

B.4 - SIMULATED SINGLE FAULT CONDITIONS

Testing conducted in accordance with IEC62368-1, 2nd Edition, CAN/CSA-C22.2 NO. 62368-1 2nd Ed, Issued December 1, 2014, and UL 62368-1 2nd Ed, Issued December 1, 2014, was considered representative to the test required per UL62368-1, 3rd Ed December 13, 2019; CAN/CSA-C22.2 No. 62368-1, 3rd Ed December 13, 2019; and IEC62368-1:2018, 3rd Ed. Test was covered under E220248-A6002-CB.

ANNEX F.3.10 – TEST FOR THE PERMANENCE OF MARKINGS

Testing conducted in accordance with IEC62368-1, 2nd Edition, CAN/CSA-C22.2 NO. 62368-1 2nd Ed, Issued December 1, 2014, and UL 62368-1 2nd Ed, Issued December 1, 2014, was considered representative to the test required per UL62368-1, 3rd Ed December 13, 2019; CAN/CSA-C22.2 No. 62368-1, 3rd Ed December 13, 2019; and IEC62368-1:2018, 3rd Ed. Test was covered under E220248-A6002-CB.

**Summary of compliance with National Differences (List of countries addressed):**

EU Group and National Differences, USA / Canada

**The product fulfils the requirements of EN IEC 62368-1:2020+A11:2020**

**Statement concerning the uncertainty of the measurement systems used for the tests**

**Internal procedure used for type testing through which traceability of the measuring uncertainty has been established:**

**Procedure number, issue date and title:**

Calculations leading to the reported values are on file with the NCB and testing laboratory that conducted the testing.

**Statement not required by the standard used for type testing**

(Note: When IEC or ISO standard requires a statement concerning the uncertainty of the measurement systems used for tests, this should be reported above. The informative text in parenthesis should be delete in both cases after selecting the applicable option)

**Copy of marking plate:**

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

**DETAIL A - SERIAL NUMBER DESCRIPTION**

**7Annn YYWW L ####**

Product ID Two digit One Character Increment:  
from Innoveta year / two Location Code four digit  
label database digit week (first character sequential  
of location code number  
string)

Title: i7A Label Specification	
SIZE: A	Drawing No. i7A_LBL_01
SCALE: 6:1	Revision 01
SHEET: 1 of 1	

Note: The above markings are the minimum requirements required by the safety lab. For the final production samples, the additional markings which do not give rise to misunderstanding may be added.

<b>Test item particulars:</b>	
Product group	built-in component
Classification of use by	Instructed person
Supply Connection	not mains connected:
Supply tolerance	None
Supply connection – type	Not connected to Mains
Considered current rating of protective device	40 A. External fuse to be provided in the end product. A; Location: equipment
Equipment mobility	for building-in
Over voltage category (OVC)	OVC II
Class of equipment	Not Classified
Special installation location	N/A 0
Pollution degree (PD)	PD 2
Manufacturer’s specified Tma (°C)	25°C, per client's provided de-rating curve
IP protection class	IPX0
Power systems	not AC mains
Altitude during operation (m)	2000 m or less
Altitude of test laboratory (m)	2000 m or less
Mass of equipment (kg)	0.10
<b>Possible test case verdicts:</b>	
- test case does not apply to the test object .....	N/A
- test object does meet the requirement.....:	P (Pass)
- test object does not meet the requirement.....:	F (Fail)
<b>Testing:</b>	
Date of receipt of test item .....	2019-05-06, 2021-08-09
Date (s) of performance of tests .....	2019-05-14, 2021-08-09
<b>General remarks:</b>	
"(See Enclosure #)" refers to additional information appended to the report. "(See appended table)" refers to a table appended to the report.  Throughout this report a <input type="checkbox"/> comma / <input checked="" type="checkbox"/> point is used as the decimal separator.	
<b>Manufacturer’s Declaration per sub-clause 4.2.5 of IEC60335-1:</b>	

<p>The application for obtaining a CB Test Certificate includes more than one factory location and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided .....</p>	<input checked="" type="checkbox"/> <b>Yes</b> <input type="checkbox"/> <b>Not applicable</b>
--	--

**When differences exist; they shall be identified in the General product information section.**

---	---

**General product information and other remarks:**

**Product Description**

The i7A product family consists of non-isolated DC-DC power modules intended to be used as a component in an end-user’s power system. The modules will be offered in multiple input voltage and output voltage ranges not exceeding ES1 level. The input ranges from 4.5 - 60Vdc input at 60 A max. The output voltage will be adjustable between 0.8V to 32Vdc.

**Model Differences**

All models within the series are similar except for input rating, output rating, and size of inductor.

**Additional Information**

This report is based on CB report references E220248-A6002-CB-1, and Amendment 1, with CB Test Certificate Ref. US-33723-UL, and US-33723-M1-UL respectively, which was previously evaluated to UL 62368-1, 2nd Edition, 2014-12-01, CSA C22.2 No. 62368-1- 14, 2nd Edition, 2014-12, and IEC 62368-1:2014.

Testing conducted in accordance with UL 62368-1, 2nd Edition, 2014-12-01, CSA C22.2 No. 62368-1-14, 2nd Edition, 2014-12, and IEC 62368-1:2014, was deemed equivalent to the test required per UL62368-1, 3rd Ed December 13, 2019; CAN/CSA-C22.2 No. 62368-1, 3rd Ed December 13, 2019; and IEC62368-1:2018, 3rd Ed.

All original sample and test dates are noted in the testing portion of this report.

The nameplate included in the report is representative of all models covered under this report.

**Technical Considerations**

- The product was submitted and evaluated for use at the maximum ambient temperature (T<sub>ma</sub>) permitted by the manufacturer's specification of : 25°C. See derating curve for more details
- The product is intended for use on the following power systems : No direct connection
- Considered current rating of protective device as part of the building installation (A) : External fast blow 40 A fuse to be provided in the end product.
- Mains supply tolerance (%) or absolute mains supply : No direct connection
- The equipment disconnect device is considered to be : For building in
- The following are available from the Applicant upon request : Installation (Safety) Instructions / Manual
- The product was investigated to the following additional standard : EN IEC 62368-1:2020+A11:2020

### **Engineering Conditions of Acceptability**

When installed in an end-product, consideration must be given to the following:

- The following output circuits are at ES1 energy levels : All
- The following output circuits are at PS3 energy levels : All
- The investigated Pollution Degree is : 2
- An investigation of the protective bonding terminals has : Not been conducted
- The following end-product enclosures are required : Fire
- The maximum continuous power supply output (Watts) relied on forced air cooling from : Ranging from 5.2 to 70 CFM depending on ambient, and load. See Derating Curve
- The power supply was evaluated to be used at altitudes up to : "2,000 m"
- Test was conducted using fast blow external fuse rated 40 A. External fuse employed shall comply with IEC 60127.
- Heating Test need to re-conducted as part of an end product evaluation to ensure the max temperature of 130 C is not exceeded.
